The McKinley home in North Market street, Wednesday afternoon and evening, was a bower of beauty, a charming receptacle for social griety and cordial and unbounded hospitality. From 8 to 5 and from 7 to 11 almost one thousand townspeople and friends from Ohio cities and ceiving party, eager to grasp the hand of shed no rays, the two huge reflectors at the noted friend they so greatly admire, and that of his loyable wife. In those grounds. At 11 o'clock, the hour when and that of his lovable wife. In the south parlor, where Mr. and Mrs. McKinley received and welcomed their many guests with a hearty handclasp, assisted by Colonel and Mrs. Osborne, the decorations were noticeably beautiful. Dainty vines of green smilax festooned the chandeliers and mantel. In he great bow window the artistic decora- Youngstown. tions and festoons of smilax intermingled with roses, gave a charming effect.

In the matter of artistic and elaborate arrangement of decorations, no room excelled. Smilax tastefully festooned the curtains, while on the mantles and stands were arranged exquisite bunches of roses, hyacinths and carnations. Great, stately palms spread their feathery leaves from many a corner, as if to meet the garlands of beauty from window and chan-

CASTORIA

for Infants and Children.

MOTHERS, Do You Know that Paregorfe, Bateman's Drops, Godfrey's Cordial, many so-called Soothing Syrups, and most remedies for children are composed of opium or morphine?

Do You Know that opium and morphine are stupefying narcotic poisons?

Do You Know that in most countries druggists are not permitted to sell narcotics without labelling them poisous? Do You Know that you should not permit any medicine to be given your

child unless you or your physician know of what it is composed? Do You Know that Castoria is a purely vegetable preparation, and that a list of its ingredients is published with every bottle?

Do You Know that Castoria is the prescription of the famous Dr. SAMURL PITCHER. That it has been in use for nearly thirty years, and that more Castoria is now sold than of all other remedies for children combined?

Do You Know that the Patent Office Department of the United States, and of other countries, have issued exclusive right to Dr. Pitcher and his assigns to use the word "Castoria" and its formula, and that to imitate them is a state prison offense?

Do You Know that one of the reasons for granting this government-protection

was because Castoria had been proven to be absolutely harmless? Do You Know that 35 average doses of Castoria are furnished for 35 cents, or one cent a dose?

Do You Know that when possessed of this perfect preparation, your children will be kept well, and that you will have unbroken rest? Well, these things are worth knowing. They are facts.

2 and 4 Sherman St., Chicago. In their special market letter say: To the operator who demands action, our wheat market during the past week has been all that could be desired, for fluctuations have been frequent, sharp and rapid; but to those who prefer either a steadily advancing or declining one, with but the usual range of fluctuations, it has proved unsatisfactory and disastrous, and as usual when the trade has been whipsawed by buying on the jumps and selling on the slumps the cry of cruel manipulation has been raised. We see nothing, however, to warrant such claims and believe that the unsettled state is due wholly to natural and clearly defined causes For many weeks we have advised buying on good breaks and selling out on bulges, believing that conditions favor-ed an advance, but that the pressure of the heavy stocks which the encounter on every quick upturn would tions. The market has been bulled to a point where the short interest, other than that backed by actual wheat in to be built from Canton to Akron Ohio.

Terms of Sa e—One-half cash in hand, balance in one and two years from day of sale; the deferred payments to be secured by mortgage on the premises, with interest from day of sale, payable annually.

Store, has been largely eliminated, leaving no support on the bulges, but such fresh long buying as the temporary excitement induces. As soon as the new orders are filled. as the new orders are filled, there being

no frightened shorts, holders who attempt to realize find but a limited demand and their anxiety to save some of their accrued profits precipitates a break. As soon as their holdings are disposed of the offerings cease and the market is again in shape to respond to bull news, which thus far has been frequent and pronounced. Under such conditions traders who would avoid osses must abstain from loading up on the swells and do their buying on breaks. These rapid changes while playing havoc with the eleventh hour bulls fail to disturb those who secured cheap wheat and are now protected by substantial profits. As there are many holders thus situated the market is certain to react from all material breaks. The bears who have been driven in will doubtless transfer their operations from May to July when they again enter the market, and unless the bulls can force the July future to a premium over May and keep it there sharp breaks from all advances will follow, for the weakening of a deferred future has more or less effect on the favorite option. The chief bull support is deived from the advices from the Pacific Coast, where an active export demand is reported, and from the European claims of the probable demand for American wheat during the next three months. There has been nothing new of importance in foreign crop advices and the weather has been favorable for our growing winter wheat. The satisfactory termination of the bond call will probably enable grain carriers to secure mple funds at reasonable rates and will operate in the direction of easier money for all commercial operations. The greatest obstacles to a permanent advance are the heavy stocks, the cease-less stream from the farms of the North-

ors and the liberal offerings in European markets of Russian and Argentine wheat for April and May delivery.
While corn and oats ductuate with wheat, they have moved within narrow limits and are chiefly influenced by conditions differing from those ef-fecting wheat. In the former the foreign demand is everything; in the latter it is but of minor importance, domestic conditions overshadowing everything The chief bulwarks of strength of both these coreals at present are the unusually low prices. We believe that before the May option expires specula-tion will have run its course in Wheat and that corn and oats will absorb the attention of a multitude of operators and that either of them bought when wheat has had a severe break will prove
